Regenerative Pathways is a Future Stewards initiative. Its mission is to support business in becoming more regenerative.
Becoming regenerative is one of the greatest challenges of our time.

Standard economic thinking and business models are becoming outdated. Nature is under stress. Capitalism is under pressure. A new generation of employees and customers expects business to adopt wider goals that serve people and planet. Yet near term financial pressure is intense. We’re at a fork in the road.

Regenerative Pathways offers a clarifying route through the noisy debate around headline pledges, corporate responsibility, stakeholder capitalism, ESG reporting, mitigating environmental risk and seeking new opportunity.

Business wants to step up its response. The question is how?
Regenerative: where do you start?

Becoming regenerative is a journey. These four principles are a good place for any company to begin.

1. Leave things better than you find them
2. Support a healthy society
3. Think about your whole ecosystem
4. Include all voices
Leave things better than you find them

Successful companies are developing strategies that progressively improve people’s lives and the environment around them.

Do you know how to transform your mindset and actions from ‘doing less bad’ to ‘doing more good’?
Support a healthy society

Leading edge companies recognize that their long-term success relies on all parts of society prospering. If one community or country suffers, we all end up being affected.

Are you engaging with society, building community, and supporting those being discriminated against?
Think about your whole ecosystem

Climate change and the loss of biodiversity are reminding us that all our lives depend on a diverse and healthy environment. We cannot separate our personal wellbeing, our company’s profitability or the global economy from the planet’s ecosystem.

Are you recognizing fully the impacts you have on the environment and helping nature to regenerate?
Include all voices

Visionaries, entrepreneurs, creatives, policy makers, activists, and business leaders. Diverse groups are better innovators.

Who can you team up with to create success based on regenerative principles?
We’re deeply immersed in building a regenerative future

We bring together an exceptional network of experts, including top thought-leaders, scientists, CEOs, innovators and activists working at the heart of the regenerative movement. These experts can help you develop, and operationalize, a strategy to suit your business.

We work in a tailored, collaborative way. We offer a unique set of workshops and methodologies which adapt fully to your needs and bring your organisation up to speed.
Regenerative Business

Traditional economic thinking and prevailing business models are becoming outdated. Powerful new ideas are spreading fast – from the circular economy to ambitious ESG.

• Why does Regenerative business matter and where does your business sit in the new economic landscape?

• Build your own playbook to thrive in a world of intensifying – and competing – stakeholder demands.

• Explore the metrics leading companies are adopting – and how to integrate them to deliver on your strategy.

New ways of doing business – to get ready for success in the economy of the future.
Climate Made Clear

The world is watching – demanding business leaders to be at the front of climate action.

• Understand the science, predicted consequences and tipping points.

• Learn from companies mapping new opportunities, taking action and delivering results.

• Explore the processes, targets and metrics that will drive sustainability and performance.

The science of climate change, what it means for your company and how to respond to it.
Futures Toolbox

What does it take to be a visionary leader in the 21st century?

Future-fit leadership
• Develop agency, awareness and fluency on emerging trends.
• Apply tools to strategic choices on system-wide issues.
• Gain a deep capacity to navigate your changing landscape.

Winning the future
• Evaluate tough conflicts and trade-offs.
• Swap habitual patterns for original problem-solving and innovation.
• Develop shared language to build team effectiveness and impact.

Powerful tools developed by some of the world’s leading Futures practitioners.
Some of our partners

Christiana Figueres is a founding partner of Global Optimism and Future Stewards. A world leader in tackling climate change, she led the historic Paris Agreement in her role as Executive Secretary of the UN Framework Convention on Climate Change (2010-2016).

Tom Carnac is a founding partner of Global Optimism and Future Stewards. Tom was Senior Advisor to Christiana Figueres when she was Executive Secretary at the UN Climate Convention. Before this, he was President and CEO of CDP North America.

Bill Sharpe is a leading Futures practitioner and researcher in science, technology and society. Bill has undertaken consulting a wide range of consulting work in technology, strategy, research and innovation for international clients in the public and commercial sectors.
